Local Talent Stage Green Stockings

Plays come and go, but "Green Stockings," a three act comedy, staged by local talent in the Hall last week, excelled all its predecessors. All were delighted with the play. Not only was the hall crowded, but over one hundred dollars was raised. Congratulations of the highest order are due the actors for their indefatigable and unceasing labors to make the play such a decided success. There were many good laughs in the play and these were splendidly brought out by the actors.

The Artists would like to take this opportunity of thanking the Director, the Critics, the Advance and others who helped to make the play such a success.

Let us hope that the dramatic work now commenced, will be continued throughout the winter.

IMPORTANT NOTICE

There will be no meeting of the U. F. A. on Friday evening owing to the Chautauqua being held this week. The next entertainment will be on Friday 18th inst. A rousing debate will enliven the proceedings.

On Saturday afternoon 12th inst., there will be a special business meeting, when important issues, including discussion of plans for re-establishment of wheat board, will be presented. All farmers and farm women are urged to be present at three o'clock in the Chinook School.—J. P. Watson, Secretary.

The Youngstown District meeting of the Methodist Church gathered at Cereal on Tuesday, Nov. 1. Six ministers and two laymen were present from the various circuits of the district.

A paper on Prof. Hooke's book "Christ and the Kingdom of God" was read by Rev. G. A. Kettys, and a discussion followed.

The remainder of the afternoon was spent in discussion of plans for the furtherance of the work of God on the various fields represented.

Splendid Attendance At Chautauqua

The Chinook Chautauqua Festival opened on Tuesday and fine audiences were in attendance at both performances, the hall being filled to its utmost capacity in the evening.

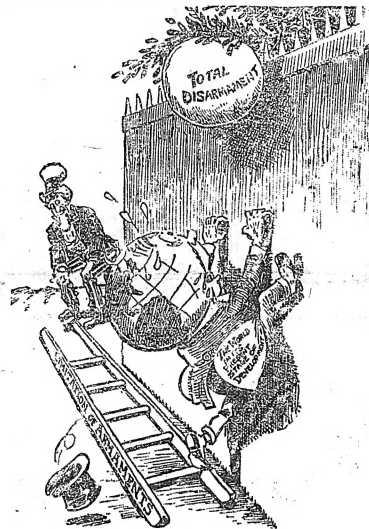

The Alexander Trio was the attraction in the afternoon, and they were very highly appreciated by the audience.

In the evening Morris G. Hindus for over an hour held the rapt attention of the audience in a lecture "Storm Tossed Russia." Everybody was delighted with the information imparted. His graphic description of the life of the Russian peasants, the food, the way they made bread and furnished their homes, was most interesting. From that he went on to explain the Russian problems and their relation to the peasants who formed by far the greatest majority of the population of Russia. The speaker made it plain that the Russian peasant was not in sympathy with the Bolshevik ideas of government ownership, only in so far as they concerned the railways, banks and factories, in which they were not interested anyway. But had stubbornly resisted the Bolshevik scheme for the government ownership of land, instead demanding that each peasant should own a parcel of land large enough to keep himself and family.

Wednesday's program consisted of The Artists' Concert Party, each member of which is a soloist of real standing in musical circles. Also two very fine lectures. Dr. H. B. Burns spoke in the afternoon on "Chords and Discords," while in the evening Miss Lethe Coleman gave a very fine lecture on "The Homing of the People."

The grand closing concert by "The Old Fashioned Girls," and character impersonations by S. Platt Jones is on to-day's program and will wind up three days of keen enjoyment both pleasant and educational.

Miss Davis, Supt. of Chautauqua, Misses Blanche and Alice Deman and Mr. Dunn were guests at the Wylie residence for dinner on Sunday.

"We can't make it in one step."

—Gale in Los Angeles Times.

Chautauqua Specials!

During Chautauqua Week we are offering to the public, a straight

Discount of 10 per cent

On every article in the store excepting Groceries.

Now is the time to procure your Gingham, Flannel, Underwear, Smocks, Boots and Shoes, Mackinaws, Work Shirts, Gloves, Mitts, Blankets, and in fact everything needed for Winter wear.

Reduce The Expenditures

The public debt of Canada is seven to eight times what it was seven years ago, and the great bulk of this enormous increase in debt represents money borrowed at a much higher rate of interest than this Dominion was called upon to pay prior to 1914. The result is that Canada's annual interest charges are now almost, if not quite, equal to the total revenue and expenditure of the Dominion a comparatively few years ago.

In addition to this tremendous drain upon the revenues of the country, Canada has a national railway system which is operating at a loss of more than a million dollars a week. Sir Joseph Flavelle, now chief of the Canadian National Railways directorate, declared a few weeks ago that the loss for 1921 would be between \$67,000,000 and \$75,000,000. He added that the system would continue to lose money and he estimated that it would be from three to five years before it could even pay operating expenses, and that it might be ten years before interest charges as well could be covered by earnings.

Canada also has today an extensive Government Merchant Marine which is operating at a loss, with many vessels tied up in harbors, and the capital value of the ships enormously depreciated as compared with their original cost.

Coupled with these facts the country is faced with a declining revenue from Customs occasioned by decreased world trade, and the decreased buying power of the Canadian people.

Faced with such a situation in his personal business, what would a keen financier, manufacturer, or business man do? What, in fact, do such men always do when they find liabilities and debts piling up? There is only one answer: They cut out every item of expenditure they possibly can; they stop expenditures on new ventures unless they are of an immediate revenue and profit producing character; they throw all their skill and energy into bringing their expenditure within the limits of their revenues, and rigidly refrain from incurring any new liabilities. In a word, they safeguard all their resources and devote careful attention to the strengthening of their credit.

And surely that which long experience has taught the keen financier and commercial magnate to be good business, is equally good business for the nation. But is Canada profiting by the lessons of such experience? It would seem to be necessary to record a negative answer.

In the press reports we still read of contracts being awarded for great works, such as drydocks for the Pacific Coast, to cost millions of dollars. Reports of the launchings of new ships for the Government Merchant Marine still appear in print although it is an acknowledged fact that there is now a surplus of world shipping and those now in commission are losing money. Only the other day announcement was made that it had been decided to revise the building of wooden ships on the Pacific Coast.

With declining business and falling revenues, a business man loses no time in decreasing his staff; but in Canada our Governments continue to pay salaries to a top-heavy civil service, employing two and three men, or women, where one would be sufficient for the work demanding attention.

At a time—three years after the close of the war—when Canada should be beginning to gradually reduce the great debt created by the war, the appalling fact is that the national debt is still increasing, little or no attempt is made to restrict expenditures, and certainly no truly courageous effort is made to meet the needs of an exceedingly serious situation.

The inevitable result is that taxation is not only heavier than ever before known in this Dominion, but it is increasing. It is becoming more and more with every addition to the national debt, and as it must continue to increase until a vigorous and really effective attempt is made to stop all unnecessary expenditures, eliminate all waste and extravagance, and reduce the total of all national expenditures to a figure, not only within the revenue, but which will produce a surplus to apply in the reduction of the existing debt.

This is not a political article in a partisan sense. The situation we have outlined in regard to the Dominion is more or less true in most of the provinces and municipalities. The debt of Ontario has been largely increased, while recent figures show that the gross debt of the City of Toronto was increased by nearly \$26,000,000 between January 1 and September 30 of this year.

In view of present world conditions, this tendency to add to national, provincial and municipal debts is all wrong. It is time the people, who must bear the burden and who will be the chief sufferers in the long run if a halt is not soon called, must emphatically demand a return to sanity and the exercise of the same prudence in the management of public business which the great majority of them insist upon in the handling of their private affairs.

Daughter Will Not

Live With Kaiser

Refuses to Keep House For Him in Holland

The former Kaiser's daughter has declined his request that she go and keep house for him in his exile writes a correspondent. His patient wife is in her grave. His sons are scattered about, spending the incomes left after the collapse of their father's soaring ambition to rule the world by force of arms. And Wilhelm frets and fumes in what is practically captivity in Holland. A weary man, no doubt, and vastly unhappy in a bed whose thorns are discontent, vain regrets, and constant comparisons of his present wretched condition and cir-

cumstances with the power and glory that once were his, now wasted away in the blood of millions of his fellow-creatures. No wonder an exchange quotes for him: "Which way I fly is hell; myself am hell."

It has Many Qualities—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cold, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself, and can be got for a quarter of a dollar.

The total length of London Bridge, with the approaches, is half a mile. The bridge rises to 223 feet above the water, and cost \$5,810,000 to build.

BAYER Aspirin

Nothing Else is Aspirin—say "Bayer"

Warning: Unless you see name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an unbroken "Bayer" package which contains directions worked out by physicians during 21 years and proved safe by millions for Colds, Headache, Rheumatism, Neuralgia, Neuritis, Lumbago and Pain. Made in Canada.

All druggists sell Bayer Tablets of Aspirin in handy tin boxes of 12 tablets, and in bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monrovia, California. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

French Soldier Will Wear Khaki

But Not Until Stock of Horizon Blue Is Exhausted.

Horizon blue will be replaced by khaki as the color of the uniforms worn by French officers and soldiers, under a decision reached by the superior war council. The uniform of the French army will in future be similar in color to those of the British army.

The order for the change in the uniforms of the French army will not immediately come into effect, but will be operative when the present stocks of horizon blue cloth are exhausted. These stocks, it is said at the ministry of war, are sufficient to last for ten years.

Select Laxative Medicine With Great Care

In debility and weakness, medicine should be mild and far-reaching. Many pills and purgatives are harsh, are drastic instead of curative. Excessive action is always followed by depression, and knowing this Dr. Hamilton devised his pills of Mandrake and Butternut so as to mildly assist liver and kidney activity, so as to flush out the system by toning and regulating the bowels. Thus Dr. Hamilton's Pills eliminate poisons from the body, they give the skin clearness to the skin, thus they renew health and strength. To keep your system in healthy good working order, regulate it with Dr. Hamilton's Pills, 25c all dealers or The Catarinone Co., Montreal.

Existence Varied.

New Butler.—At what time, sir, would you wish to dine as a rule.

Profiteer.—At what time do the best people dine.

New Butler.—At different times.

Profiteer.—Very well. Then I, too, will dine at different times.

STERN REMINDERS OF RHEUMATISM

The Trouble Must Be Treated Through the Blood.

Every rheumatic sufferer should realize that rheumatism is rooted in the blood and that to get rid of it, it must be treated through the blood. The old belief that rheumatism was caused by cold, damp weather, is now exploded. Such weather conditions may start the pains, but it is the cause. Liniments and outward applications may give temporary relief, but that is all they can do because they do not reach its sources in the blood. The sufferer from rheumatism who experiments with outward applications is only wasting time and money in depending upon such treatment; the trouble still remains, and it is all the time becoming more firmly rooted. Treat this disease through the blood and you will soon find relief. Dr. Williams' Pink Pills act directly on the impure, weak blood; they purify and strengthen it, and so act on the cause of the rheumatism. Mr. P. J. MacPherson, R.R. No. 5, Carleton, P.E.I., says: "About three years ago I was attacked with rheumatism. I began taking Dr. Williams' Pink Pills and soon the trouble disappeared and I am in better health than before. I am now an old man and my rheumatism was badly crippled with rheumatism in my arms and legs, and who suffered very much. She, too, took Dr. Williams' Pink Pills and is now able to do her household work. I tell you this because I may be of benefit to some other sufferer."

You can procure Dr. Williams' Pink Pills through any dealer in medicine or they will be sent you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Firm's Contract.

It is officially announced that it has been decided, subject to certain formalities, to place the whole contract for the erection of 36 frame elevators in South Africa with a Canadian firm. It is understood that part of the machinery will be purchased in Great Britain, but almost the whole cost of the buildings, other than the structural steel to be used therein, will be expended in South Africa.

Getting the News.

"Is my wife going out this evening?" Inquired the lord and master as he entered the house.

"She is, sir," the maid responded.

"And," he further questioned warily, "am I going with her?"

York Sun.

HEART WOULD BEAT LIKE A TRIP HAMMER

Heart trouble has of late years become very prevalent. Sometimes a pain catches you in the region of the heart, now and then your heart skips a beat, or you feel as if it were beating with such rapidity and violence you think it is going to burst.

We know of no remedy that will do so much to make the heart regain strength and vigor, regulate its beat and restore it to a healthy normal condition as will

MILBURN'S HEART AND NERVE PILLS. Mrs. Chadwick, Delhi, Ont., writes: "I had palpitation of the heart, and the least exercise, such as going upstairs or up a hill, my heart would beat like a trip-hammer and at times I was dizzy-headed and had a sinking sensation as if my time were near."

A friend suggested I try Milburn's Heart and Nerve Pills, so I procured three boxes, and by the time the first box was used I began to improve. In all I took six boxes, and now although in my 66th year I feel like a young girl, no dizziness or heart-thumping, and can walk miles without fatigue.

At time of sickness I weighed 120 lbs., now I weigh 150.

Price 50c a box at all dealers, or mailed direct on receipt of price by The T. J. Milburn Co., Limited, Toronto, Ont.

Discovery of Borax

Preservative Power Discovered by Prospector in Yellowstone Park

The wonderful preservative power of borax were first discovered in Yellowstone Park, Wyoming. A wandering prospector in that desolate though picturesque region came across the body of a horse, which, although it must have died long before, was perfectly whole and sweet. Looking around for an explanation of the phenomenon, he found that the animal was covered with a layer of fine dust, which proved to be borax. He saw the commercial value of his discovery and sold the secret to a large packing firm in Chicago.

Where fifteen English women students come forward in any one district, the British ministry of labor is empowered to institute classes in cooking and general domestic work.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

B.C. Box Factories Busy

Total Output For 1921 Will Be 300,000 Packages

The output of the box factories at Wyndland and Canyon City this year is more than double that of 1920 and fifty per cent. greater than any previous year's. Of apple boxes alone about 150,000 have been made, some of them going to packing stations in the Okanagan while all the local requirements have been supplied. Grapes and boxes for all the produce of the district, which includes apples, peaches, plums, peaches, cucumber, tomatoes, are made in large quantities at these factories, whose total output this year will be at least 300,000 packages.

Great Demand for Cypress Cedar

Lumber Sells From \$150 to \$200 Per Thousand Feet.

The Steltz Manufacturing Company, Ltd., which operates a large shingle mill at Rusken and has extensive timber limits, will probably erect a sawmill either at Vancouver or at Stave Falls to manufacture cypress cedar lumber. There is a great demand for cypress cedar for making storage battery boxes, tubs for washing machines, etc.; it sells at from \$150 to \$200 a thousand feet. It is reported that the company has about two hundred million feet of cypress cedar under their limits at Stave Lake.

Edmonton Man

Discovers Pure Iron

Millions of Tons Will Not Require Mining.

A valley of almost pure iron lying on the shores of Lake Athabasca with deep water right to the claims, has been discovered by N. C. Butterfield and his son, according to the Edmonton Bulletin. Analysis of the claim shows that it is 64.36 pure iron, 150,000 tons have been measured out, while 5,000,000 tons, in the shape of house blocks, are lying on the surface of the ground close to the lake, ready for shipment without any mining operations being necessary.

See is one of the few things that are really what they're cracked up to be.

The longest mile is Sweden's—11,590 yards; the shortest, China's—705 yards.

Never kick a hornet's nest just to ascertain whether the family is at home.

Dried Fruits For Thrift

BY LORETTA C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

It is always a problem for the housewife of limited means to give her family fruit. Yet so necessary is fruit in the diet that we must strive to put it in at least once a day even when the food allowance is small.

Practically every baby book suggests orange juice as part of the baby's diet, but one can readily understand that when oranges reach ten and fifteen cents apiece, as they do in all too many northern and eastern markets, that the orange must be saved for the baby and the rest of the family must look for the cheaper fruits.

Even the apple gets beyond the purse at times. When this occurs, try using the dried apple. It requires more time and patience to prepare dried apples for the table, but since the health of the family is a consideration, the time and effort expended seem worth while.

Wash and pick over well a measure of dried apples and then put them to soak in the water in which they have been soaking, adding more water if necessary. When soft, press through a strainer and add two level tablespoons of sugar, and either a few grains of nutmeg or a couple of drops of lemon or vanilla extract. This apple sauce may be served at breakfast.

If one desires a dessert for the Sunday dinner, the apple sauce made from dried apples may be made into apple snow. To a cupful of strained apple sauce add two egg-whites, cup sugar, a little lemon juice and grated rind and the white of one egg. Beat all with an eggbeater until white and fluffy.

To make prune whip, or apricot whip, substitute the pulp of either for the apple sauce and omit the lemon, if not liked. Two cups white make the dessert a little more rich, but one egg white is enough. Chill the "snow" and serve with a boiled custard flavored with vanilla and chilled.

To make a soft custard, seal a cup of milk. Beat one egg slightly and add to it all the produce of the districts, which includes apples, peaches, plums, peaches, cucumber, tomatoes, are made in large quantities at these factories, whose total output this year will be at least 300,000 packages.

The loose figs should be scrubbed and picked over, and then either steamed or cleared with just a little water. Sugar may be added, but it is well to learn to like stewed figs without. Dates or figs may be mixed with farina or white cornmeal mush. They add to the dish and make extra sugar unnecessary. Also, these fruits help to give bulk to these rather "fine" foods.

Put dried raisins into your bread and rice and other cereal puddings. Chop the raisins up with some nuts and a little lemon juice and make sandwiches of the mixture for the afternoon tea party or the kiddies' lunch box.

GILLETT'S LYE

Just Before the Battle. Miss Sayitt.—Oh, is that your husband's photograph? I knew he must be good-looking—your children are so pretty.

A Corrector of Pulmonary Troubles. Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in relieving disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will ally inflammation in the bronchial tubes.

Reindeer herds double in number every three years.

The largest sweetshop in the world was recently opened in New York.

Try a Bottle To-day

DR. MINARD, Inventor of the Celebrated

MINARD'S LINIMENT

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

THIN, FLAT HAIR

GROWS LONG, THICK

AND ABUNDANT

"Dandruff" costs only 35 cents a bottle. One application ends all dandruff, stops itching and falling hair, and in a few moments, you have doubled the beauty of your hair. It will appear a mass, so soft, lustrous, and easy to do up. But what will please you most will be after a few weeks use, when you see new hair—fine and downy at first—yet really new hair growing all over the scalp. "Dandruff" is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. This delightful, stimulating tonic helps thin, lifeless, faded hair to grow long, thick, heavy and luxuriant.

Sees Great Advantages For Western Canada In Waterways Scheme

Hamilton, Ont.—The first business at the session of the Canadian Deep Waterways and Power Association was the reelection of the old officers. In view of the feeling expressed that much educational work must be done in Western Canada, several delegates expressed the opinion that the present officials of the association should be re-elected so that the organization will benefit to the fullest extent by their experience.

George A. Graham, Port William, expressed the opinion that the eastern province of Ontario would be benefited by the project of the deepening of the St. Lawrence River almost as much as the western districts. With the opening of the river channel new markets to the west would be opened for Nova Scotia coal, iron and steel products. Nova Scotia coal would displace Pennsylvania coal in Ontario as far west as the head of the lakes.

L. P. Coleman, Hamilton, said the project should not be viewed as one to take traffic away from the railways, but one to create new business. Secretary Lewis read an interesting paper contributed by Thomas Conlon, of St. Catharines, a former lake captain and vessel owner, who endorsed the ship canal. He said he

had reached the conclusion that if the western farmers are to maintain their European market for grain water transportation from Port William must be made possible westward to Edmonton by lake and by river. He outlined a scheme for connecting up points west by means of barge canals. The next convention will be held at Welland.

The delegates were entertained at a banquet by the Chamber of Commerce, W. R. Driman presiding. Interesting addresses were heard from Henry I. Harriman of Boston, president of the New England Power Company, and A. W. Jefferys, United States congressman for Nebraska.

Mr. Harriman stated that business would increase in other ports as it was extended to the cities which would benefit from the project. Wheat, he added, at the present time could be brought from the head of the lakes, one thousand miles for two cents a bushel while the cost of transportation from Buffalo to the east was ten cents. His scheme was to carry the grain in bottoms from the head of the lakes to Boston, providing the St. Lawrence was navigable, and the cost would be but seven cents, he asserted, a benefit to consumers in the east as well as the producers in the west.

WESTERN PROVINCES REPRESENTED AT SWINE BREEDERS' CONFERENCE

Ottawa.—With the object of placing the Canadian bacon industry on a solid foundation and securing for it the premier position throughout the world, a two-day conference of representative swine producers from practically every section of Canada was held here under the chairmanship of Dr. J. H. Grisdale, deputy minister of agriculture for the Dominion. In addition to the swine producers, there were present deputy ministers of agriculture from various provinces or their representatives, including: H. A. Craig, deputy minister for Alberta; Hedy Auld, deputy minister for Saskatchewan, and James Evans, deputy minister for Manitoba.

The discussion at the opening session revolved around the question of the establishment of a systematic grading system for hogs. The question was asked if the producers and farmers were getting full value for their hogs under the present system. It was argued by some of the producers that the drovers should do the grading. Other delegates advocated the appointment of official graders or referees at the livestock markets and abattoirs.

After a somewhat extended discussion, a resolution requesting the Federal Department of Agriculture to establish standard grades on livestock and hogs, was passed unanimously.

Will Represent Canada

Sir Robert Borden to Put Wreath on U.S. Hero's Grave

Ottawa.—Sir Robert Borden, who is in Washington for the purpose of attending the disarmament conference, will place a wreath on the grave of the United States' unknown soldier on behalf of the Canadian Government.

Sergeant J. F. Young, G.C., of the Canadian Grenadier Guards, Montreal, will represent the Dominion executive of the Army and Navy Veterans' Association, at the ceremony.

Will Supervise Construction Work

Montreal.—It is announced that Julian C. Smith, vice-president and general manager of the Shawinigan Water and Power Company, will take over the supervision of the construction work of the Manitoba Power Company in connection with which a bond issue of \$7,500,000 was recently handled by the local firm of Nesbitt Thomson and Company.

Suspect Attempted Poisoning

Toronto.—The police are investigating an attempt to poison Sam Restivo, a fruit merchant, his wife and six children. Milk left in a bottle in the doorway was tampered with. The pet dog drank a small quantity and died almost immediately.

New Canadian Liner Launched in England

London.—The Cunarder Andania, designed for the Canadian service, was launched at HarbournTyne, Lady Perley performing the christening ceremony.

The liner is 540 feet long, 65 feet broad and 43 feet deep, and speed 14 knots. The new ship is expected to be ready for commission next spring. It will have accommodation for 500 cabin and 1,200 third-class passengers. No other classes are provided for. It will burn oil as fuel and some of the innovations are a verandah cafe and a spacious playground for children.

Sir Thomas Royden, presiding at a luncheon, said the company hoped to run a regular service to Canada.

Situation at Lake Terminus Is Serious

Talk of Securing Steamers to Store Grain for Winter

Port William, Ont.—If for the next two weeks, grain stocks at the head of the lake accumulate as fast as they did last week, the storage at Port William and Port Arthur will be plugged by Nov. 15. A million and a half more bushels came here last week than were shipped out, and this left over thirty million bushels in store.

Stretched to the uttermost, allowing for the separation of grades, the elevators here cannot take more than forty-eight million bushels, and this would be all taken up in less than three weeks from Nov. 1. Already there is serious talk of securing a large fleet of steamers to come here and lie up for the winter, taking on grain so as to relieve the elevators.

With the scanty demand for wheat for export the situation has never looked as serious at this season of the year as far as storage is concerned.

Brothers Charged With Embezzlement

Said to Have Taken More Than Two Million

San Antonio, Tex.—Paul and Peter O'Brien, brothers, and for thirty years employed in the Sullivan & Co. Bank here, a private institution, were arrested on an indictment charging embezzlement. A total of 150 indictments were returned against each and charge the theft or embezzlement of more than two million dollars. The O'Briens left the employ of the bank six months ago.

Wins Aerial Derby

Kansas City, Mo.—Lloyd Bertaud, of New York, won the American Legion Aerial Derby race over a 140-mile triangular course here. His time was 60 minutes, 15.25 seconds.

Bolsheviks Quit City

Enzell, Persia.—Bolshevik Russian troops have evacuated this city as provided by the new treaty between Moscow and the Communist Government of Persia.

Many British Flags At U.S. Convention

Escorts Who Met Admiral Beatty Greeted With Cheers

Ottawa.—That British flags were being carried and cheered by delegates to the convention of the American Legion in Kansas City, was stated in a message received at Great War Veterans' Association headquarters here from N. B. Maxwell, Dominion president, and Rev. C. E. Jenkins, fraternal delegates representing Canadian ex-servicemen at the convention. Mr. Maxwell, in his message, declared the spirit of the gathering "would prove to be one more step towards a better understanding between the British and American people."

When the contingent of Britishers marched to meet Admiral Beatty, they were everywhere cheered and no untoward remarks were heard as they escorted the famous admiral through the streets.

"Admiral Beatty has made a splendid impression," Mr. Maxwell wired. "Enemies of Britain in the United States are dismayed at the unanimity of public opinion which acclaims this British star as the foremost hero of sea warfare during the present century."

Conditions Gradually Returning to Normal

New York.—Reginald McKenna, former chancellor of the British exchequer, who has been making a three-weeks' study of the commercial and economic situation in America, declared in a statement "that the financial horizon seems clear, and thought it will probably be some considerable time before normal conditions are restored. I am inclined to say that the corner is turned."

"I would like to add, however," Mr. McKenna said, "that it is no time for speculation. Recovery is bound to be slow, working through a period of moderate fluctuation, though I hope, and expect, that the tendency will be an improving one."

"I find," Mr. McKenna continued, "that very considerable interest is taken in the question of international debts between governments. This is a subject on which I could only venture to speak from the British point of view. We are large creditors, and in relation to the United States, we are also debtors. As a debtor, I have nothing to say except that Britain pays her debts. On the other hand, speaking as a creditor, my opinion is that Britain would be selfishly wise having regard only to her industrial and economic position, to remit the obligations due to her."

"If I dared to tread on dangerous ground for a moment it would be to say that the influence of the United States is indispensable in the councils of Europe and the Far East. The bonds of trade, and the responsibilities which arise from this relationship cannot be ignored without great loss to the world and an unfavorable reaction upon ourselves. In England, the call of the conference by President Harding is most warmly welcomed, and it is hoped that the results will be the first step towards a general agreement has assumed the responsibility of bringing together the prime ministers of other nations to confer upon the means of securing lasting conditions of peace. Peace and industry are the prime needs of the world at the present time, and the world looks to the United States to lead the way."

Give your local merchants a chance. Day at home.

Canadian Veteran Heir to Estate

Informed of Legacy While Working in U.S. Public Parks

Youngstown, Ohio.—While working in parks here as one of the city's unemployed, C. P. Virtus, 28, former Canadian soldier, received a letter from a trust company of Edmonton, Alta., informing him that he had become heir to his father's estate valued at between \$40,000 and \$50,000.

The letter said a will leaving the property to Fisk University, Nashville, Tenn., had been found, but as the will had not been witnessed, it is not regarded as valid under Canadian law.

Information Wanted On Soviet Offer

Note Mentions Assuming of Imperial State Debts Only

London.—Great Britain, it was indicated in authoritative quarters, will reply to the recent note of M. Chicherin, foreign minister of Soviet Russia, offering conditionally to assume the debts of old Russia up to 1914, by the dispatch of a note pointing out the Soviet's offer mentions only the imperial state debts, which are but a part of the Russian total.

It will also set forth that the conference to establish peace desired by the Moscow Government would be possible only after an allied, or preferably an international consensus of opinion was obtained regarding the policy that was to be pursued toward Russia's indebtedness.

Victim of Wreck Had Valuable Picture

Kamloops, B.C.—A painting purchased from a German prisoner overseas by Gen. Goodwin, one of the victims of the wreck in the Palliser tunnel disaster in October, proved on expert examination to be an old master, whose name was not given out, and was valued at \$60,000.

Goodwin was on his last trip as a railwayman, preparatory to taking the picture to Europe, when he was killed. He left a wife and two children.

Assumes Presidency

Buenos Aires.—Felix Palza has assumed the presidency of the republic of Paraguay, following the deposition of President Gondra, against whom a revolutionary movement broke out, says a despatch to La Nación from Asuncion.

STANDING IN HIS OWN LIGHT

FACE THE SUN AND THE SHADOWS WILL FALL BEHIND.

U.S. Becoming Alarmed Over Rapid Decrease Of Canadian Trade

Germans Offer to Rebuild Villages

Paris.—Representatives of a German syndicate called on M. Loucheur, minister of liberated regions, and offered to rebuild twelve villages in the Somme district with German labor and material, the reconstruction to be considered against the reparations account under the Loucheur-Rathenau agreement. He informed M. Loucheur that 2,500 workers were ready to reconstruct the twelve villages within a year.

The minister asked the Germans to return later, when he would inform them of his decision.

Has Confidence In Disarmament Meet

First Lord of British Admiralty Not Looking For Failure

New York.—Confidence that much good would come out of the Washington conference on the limitation of armaments, was expressed by delegates from Great Britain, Italy and China, on their arrival here on the Olympic, Lord Lee of Fareham, First Lord of the British Admiralty, in a formal statement said:

"So far as I am concerned, and here I speak not only as the responsible head of the British Admiralty, but as one of the official delegates, I come in a spirit of quiet confidence that the results of this conference will be such as to amply justify President Harding's far-seeing initiative, and, personally, I am not prepared even to contemplate the possibility of failure. To do so would be to assume that the world was afflicted with an incurable insanity and could not be restrained from suicide."

"We have plastered loans all over other countries which express regret at the death of our sons while we have been singing with credits to the one country destined naturally to be our very best customer."

Seek to Prevent Grain Blockade

Railway Companies Co-operate to Relieve Congestion at Lakes

Winnipeg.—A meeting was held here between the representatives of the two railway companies and the members of the Northwest Grain Dealers' Association, when conditions at the lake front with respect to grain storage were discussed.

It was decided that the line elevator companies and the co-operative elevator companies would lend assistance if called on in order to prevent anything in the nature of blockade at the lakes.

"As far as the Canadian Pacific Railway is concerned," said D. C. Coleman, vice-president of the company, "there is no congestion on the line and if lake tonnage continues to offer in any volume at Port William, loading restrictions will not be necessary."

Treaty Awaiting Signatures

Will Settle Commercial Matters Between Italy and Russia

Rome.—The commercial treaty between Italy and Russia, negotiations of which began some time ago, has been put into draft form and is awaiting signatures of Marquis Della Torretta, the Italian foreign minister, and M. Vorovsky, the Soviet representative here. The proposed treaty contains reciprocal clauses regarding imports and exports, the entrance and exit of the ships of both nations at each other's ports. The treaty does away with all trade barriers except as to the importations into Italy of alcoholic liquors from Russia. The Russians agree not to requisition any Italian goods.

Australian Premiers Confer

London.—A Reuter cable from Melbourne says that a conference has been opened between Federal Premier W. M. Hughes and the Australian state premiers on questions of uniform railway wage throughout the Commonwealth, disposal of the wheat harvest, soldier settlement, finance and future arbitration in labor disputes.

Winter Work for Prince Rupert Dock

Prince Rupert.—J. E. Simmons, of the Simmons Construction Company, Winnipeg, has arrived here to commence the construction of the ocean dock superstructure. Work will continue throughout the winter months.

Promoted to General

London.—Lieut.-Gen. the Earl of Cavan, who will act as military expert to the British delegation in the Washington conference has been promoted to general.

New York.—The trade of the United States with Canada "right now is waving a red flag," declared the New York Herald in an editorial discussing the fact that the value of United States' exports to Canada is decreasing much more rapidly than that of United States' imports from the Dominion. The Herald suggests in this connection the advisability of extending larger credits to Canada.

"Canadian values are not very far apart from our own," the paper says. "If, therefore, we lose two dollars of sales to Canada for every dollar of sales that Canada loses to us, we are moving decidedly in the wrong direction."

The paper declares that this is what the United States has been doing, quoting figures to show that for every dollar that Canada exports to the United States has gone down in the last year, United States' exports to Canada have gone down two dollars and a quarter.

"And Canada, let us not forget, has become our second biggest and best customer in the world," continues the Herald. "With our Canadian exports of approximately a billion dollars a year, only the United Kingdom surpassed Canada in the volume and value of goods bought from us. The whole of South America with Mexico, Central America and the West Indies thrown in, did not equal Canada as a buyer in the markets of the United States. Now the relative swing is heavily against us."

Discussing possible remedies, the Herald declares: "We have plastered loans all over other countries which express regret at the death of our sons while we have been singing with credits to the one country destined naturally to be our very best customer."

Lady Laurier Dies After Brief Illness

Distinguished Canadian Woman Dies At Age Of Eighty

Ottawa.—Ottawa is in mourning for Lady Laurier. Messages are being received from all parts of the world expressing regret at the death of the venerable and noble-hearted widow of the former prime minister of Canada and great Liberal chieftain.

She is survived by two brothers, Godfrey LaFontaine, Montreal, and Charles LaFontaine, of Lisbon, Maine, a sister-in-law, Mrs. A. E. Boudreau, Montreal, and several nephews and nieces.

Lady Laurier was in her eightieth year, and caught a chill while out walking recently. Sir Wilfrid died February 17, 1919.

Abandon Loan to China

U.S. Change Plans On Default Of Republic

New York.—Default by the Chinese republic of the \$5,500,000 loan made by the Government of the United States and Savings Bank of Chicago, has resulted in the abandonment of a proposed loan to China for \$16,000,000, it was announced by a United States banker representing the Chinese consortium.

Banks in Barrie Protected

Barrie, Ont.—Mayor Little and Chief King have completed arrangements to prevent any Barrie bank from being looted. In each branch an electric alarm has been fitted which not only will sound a gong on the street, but also is connected with the fire alarm, and a number of firemen have been sworn in as special constables for emergency service.

Opposes Withdrawal of Rhine Troops

Washington.—President Harding was understood to have expressed opposition during a conference with Chairman Porter, of the house foreign affairs committee, to passage of any resolution providing for immediate withdrawal of United States troops from the Rhine.

Grain Via Vancouver

Vancouver, B.C.—Ten thousand tons of bulk grain have been booked for the United Kingdom and the continent, and if the rate continues as low as at present, in the neighborhood of 30 shillings, grain men predict a great movement through this port.

Fatally Injured In Fall

Vancouver.—Falling from the top of a British Columbia Electric railway baggage car, Charles Elliott, aged 55, died a few minutes later from injuries received.

Mortgage Sale of Valuable Farm Property

PURSUANT to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act," under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Acadia Hotel in the Village of Chinook in the Province of Alberta, on Monday, the 14th day of November, 1921, at the hour of 2 o'clock in the afternoon, the following property, namely:

The South West Quarter of Section Fourteen (14) in Township Twenty-nine (29) and Range Eight (8) West of the Fourth Meridian in the Province of Alberta, reserving unto His Majesty, His successors and assigns, all mines and minerals and the right to work the same.

Terms of Sale to be twenty per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save taxes for the current year. The vendor is informed that the above property is situated about 2½ miles from Dobson's Siding on the C. N. R., that there are no buildings and that about 45 acres have been brought under cultivation of which about 30 acres are now in stubble of 1st year's crop.

For further particulars and conditions of sale, apply to L. E. Ormond, Solicitor, Chinook, Alberta.

DATED at Calgary, in the Province of Alberta, this 30th day of September, A.D. 1921.

Approved
W. FORBES,
Registrar.

POUND NOTICE

Impounded in the pound kept by the undersigned on the N.W. ¼ of Section 21-28-7, on October 10th, One Brown Mare, about 9 years old, white spot on forehead, weight about 1150 lbs. No visible brand.

Dated at Chinook, Alberta, this 25th day of October, 1921.

J. Varcoe,
Poundkeeper.

FOR SALE

Buffet, 6 Dining Chairs, one Dining Table, one Serving Table, and one Library Table, all oak. One Range \$35. These must be sold. No reasonable offer refused Mrs. R. S. Woodruff, Chinook.

THURSDAY, NOV. 10, 1921

The discovery of rich iron deposits on the north shore of Lake Athabasca has recently been made public, E. A. Butterfield and son, of Edmonton, were the lucky finders. They report their find to be in a valley which contains millions of tons of iron ore. The sample which they brought have been found to assay 64.36 pure.

In this connection it is interesting to read the reports of experts of the U.S. Geological Survey which state that, at the present rate of consumption, the reserves of high grade iron ore of that country will be exhausted in twenty years. The best ore beds of U.S. are said to be those of Minnesota, and the best grades of these mines are 68 p. c. pure iron.

Until recently it was supposed that these deposits were by far the greatest in the world, but there has been newly discovered in northern Norway, a mass of magnetic iron ore which in bulk and grade rivals that of Minnesota. Even more important, and apparently outstanding by far the deposits of Minnesota are new ore beds in Brazil, mountains of iron ore, by far the greatest known in the world. To be got to a market, however, this ore has to be taken 800 miles by rail to the sea port.

"A struggle for the possession of this field is in prospect, for it is realized that the country which, fifty or hundred years from now, possesses these deposits will control the main trade of the world."

Canadians will await eagerly a further exploration of our newly found iron field on Lake Athabasca. We should like to know more of its extent, its accessibility, and its proximity to coal deposits; for these are factors which determine its value.

While in Edmonton last Sunday it was our pleasure to hear Mrs. Booth-Clibborn, daughter of the late General Booth, speak on "My Experience with Socialists," when one thousand men crowded the Allan theatre to hear this wonderful speaker. In part said: "I have known many fine and charming men who were socialists. I used to write to them when I was going to visit a place. I have been entertained in their homes. There are many fine things in socialism. My objection to socialism is that the rope is too short. The trouble with man lies far deeper than socialism can reach. It is not in his circumstances nor his pocket, but in his heart."

PROVINCIAL W.C.T.U. HOLD CONVENTION

The provincial W.C.T.U. convention held in Edmonton, October 5, 6 and 7, was one of the best yet. There was a record attendance and evidence of earnest sincerity of purpose, together with a growing comprehension of executive methods of presentation and carrying on of the principles of the organization. Reports showed that some excellent work has been done in different parts of the province in the various departments. Mrs. (Rev.) McPherson, of Ryley, was especially strong in the advocacy of "V" organizations; prizes school essays under the head of scientific temperance were more than double in quantity what they've ever been before and superior in quality; the grand gold medal contest held one evening well exemplified the worth of the work of this department, and splendid work is under way for the Indians.

Mrs. LaMance, of Florida, conven-

Head Hunting in the Gatineau

(1) Blue Sea Lake.
(2) Below the Paigan at Low.

To a great number of people, "the Gatineau" is a term quite as vague as was "somewhere in France" during the war. Even Canadians have confirmed explorative tendencies are abnormally ignorant concerning that section of Quebec that stretches from the Ottawa River north to Maniwaki and then on to a cluster of unnamed lakes in which the Gatineau River takes its rise.

There are, it is true, many Ottawans who claim to know the district for they variously contend that Chelsea, Kingsmere, March Lake (Blue Sea, Farm Point or Kirk's Ferry) is the real Paradise. But the vast unsettled, untraced country rolling away from the main road and the railway, they know very little.

The Gatineau has "got me" at last. For years I have fought against it, listening with ill-concealed scepticism to those who years ago succumbed to its magic thrall. I have been driven into corners and forced to take positions on the Gatineau. I have been trapped into attending exhibitions flaunting pictures of the Gatineau; I have narrowly escaped being taken to the Gatineau, and shelling parties and camping trips. And speaking of shelling, oh, you Scandinavians, what a country for winter sports!

Yet, pieces like people, have greatness thrust upon them. Circumstances took me to low circumstances over whom I had no control. They were two stern, uncompromising men.

Driving from the station (which we reached by climbing a stiff grade of one foot to the hundred), to the house that was to receive my hat, I was a eminently fitting place, which to be buried. Verily, the mortal task seemed half accomplished by merely stopping there. And within a week it "got me" so, so to the extent that I feel no pain and no artist, however inspired, ever did.

Low nestles in the embrace of close encircling hills. Perhaps it would be more accurate to say that Low is a collection of hills, clothed at this season in bronze at early morning, in flame and orange at the miles diminished, the weight of the thing increased, until I fairly staggered up to the verandah, convinced that Atlas had a feather-weight burden compared with mine. Exhausted but triumphant, I lowered it and myself upon the floor and cried:

"See the gorgeous specimen I have found!"

"What 'yer goin' to do with it?" asked my host, lukewarmly.

"Present it to the Geological Museum at Ottawa," said I. "They are crazy to have things like that."

The man irrigated a small section of the soil with tobacco Canadian before remarking:

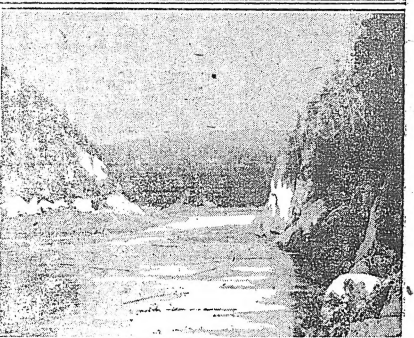

"Beats me what them fellas down there want with that ole truck! If I'd knowed what you was goin' after, I could have saved you carryin' it all them miles. I got two of them seeds in my barn."

I grasped my "abe'lef. Two? Why, the district must be a regular dinosaur repository, equal to the Red River country."

"Sure's I'm tellin' you," protested my host. "Kep' jus' fer fun, as you might say; horns and teeth perfect, oo, Beatin' yourn, there!"

"Why—why—what are they?" E faltered.

"Steers' heads," he returned, shifting his quid. "I kill a couple every fall. You can have your pick of 'em for that there Zoo-museum at Ottawa, and welcome!"

will push slowly from the rising apour as the bulk of a great ship tops out of a fog at sea.

Upon these hills adventures lurk. As health and strength returned to me (the Gatineau can work a miracle of healing) I wandered over further into the unblazed bush, and one morning thus adventuring, I stumbled over a large bone bleached white and almost perfect in point of preservation. It showed a sharp ridged jaw, a long frontal bone and horns. Considering the antiquity of the hills which geologists compute at fifty million years, it seemed reasonable to suppose that dinosaurs, megalosaurs and ichthyosaurs must have left occasional remains in remote sections. The skeleton proved to be a mammoth's.

But to which class did the bone belong? I shouldered my treasure over this way'd probably six rounds and set out for home. As the miles diminished, the weight of the thing increased, until I fairly staggered up to the verandah, convinced that Atlas had a feather-weight burden compared with mine. Exhausted but triumphant, I lowered it and myself upon the floor and cried:

"See the gorgeous specimen I have found!"

"What 'yer goin' to do with it?" asked my host, lukewarmly.

"Present it to the Geological Museum at Ottawa," said I. "They are crazy to have things like that."

The man irrigated a small section of the soil with tobacco Canadian before remarking:

"Beats me what them fellas down there want with that ole truck! If I'd knowed what you was goin' after, I could have saved you carryin' it all them miles. I got two of them seeds in my barn."

I grasped my "abe'lef. Two? Why, the district must be a regular dinosaur repository, equal to the Red River country."

"Sure's I'm tellin' you," protested my host. "Kep' jus' fer fun, as you might say; horns and teeth perfect, oo, Beatin' yourn, there!"

"Why—why—what are they?" E faltered.

"Steers' heads," he returned, shifting his quid. "I kill a couple every fall. You can have your pick of 'em for that there Zoo-museum at Ottawa, and welcome!"

—Madge Macbeth.

DESIRABLE CANADIANS

English children who recently came to Canada on board the "Empress of France." Their names are: Thomas Marshall Howard, Sydney Ashton, John Kincaid, Lawrence King, Edwin Coleman and Billy Coleman.

trict are high, and the shelter and humus given by the trees allow the once sandy waste to be used for vine culture and cereal crops.

A director's meeting of the Chinook Agricultural Society will be held in the School on Saturday, Nov. 12, at 2 o'clock.

Mr. J. S. Smith moved into his new home on Second Avenue on Monday.

Value Of Fall Rye As Dry District Crop Is Without Question

Owing to its adaptability to various soils, fall rye is being planted in favor in many sections of the west. Although up until a comparatively few years ago this crop was largely grown only as a grain, its other uses have been partially responsible for its growing popularity. It is particularly useful in the drier sections of the west where wind damage is common and everywhere that livestock is a considerable factor in farming operations. —Owing to the fact that it has possession of the ground at the time wind damage is most likely to occur, it is extremely valuable as it is largely able to resist the destructive action of the wind even when so severe that other grain crops would be failures. Its ability to stand pasturing both in late fall and early spring are the reasons for its popularity with stock raisers.

The methods and dates of seeding vary greatly in the various sections of the country. The general practice is to sow at the rate of one and one-half bushels to the acre about the middle of August on ground which has been worked as a summerfallow up to that date. —The advantages claimed for this method are that the land receives a partial summerfallow and, on a regular yield both of pasture and grain is high. Another advantage is that the crop is able to develop a good top before freeze-up, and the damage from winter-killing is practically nil. While a bushel and a half is the usual rate of seeding at this time in the more humid sections, it may be increased slightly, especially if the intention is to pasture the crop heavily or cut it for hay. In the drier sections it would be desirable to decrease slightly the amount of seed shown. When seeding is delayed until after the 1st of September, it is very seldom that the crop develops a sufficiently large top to enable it to go through the winter without serious danger of damage from winter-killing.

Another method which is rapidly coming into favor is the mixing of winter rye seed with the oats in the spring, and, in this way, enabling the land to produce two crops at the same time. As the winter rye does not shoot the first year it is sown, but merely forms a green mat close to the surface of the ground, there is no danger of the oats containing winter rye when threshed, and the amount of feed made available in the stubble during the fall is almost unbelievable if not seen. The recommended rate of seeding under this method is a bushel of oats and three pecks of winter rye per acre. Some good farmers recommend sowing the oats separately first, and, when they are about three inches high, cross-drilling with winter rye. Slightly more seed is used when this is done.

The value of fall rye as a crop for the dry districts and where wind damage is common and also as a pasture and hay crop is unquestioned, and fall rye is destined to increase in popularity as its good qualities become more widely known.—J. N. D. Mackenzie.

South Africa Wants Market For Maize

Collapse of German Mark Shatters Hope of Doing Business.
A Reuters despatch from Cape Town says increasing difficulty is being experienced in finding markets for South African maize, the production of which enormously exceeds local requirements. Today's world prices are below those current in South Africa and it no longer pays the farmer to produce for export. Great hopes were entertained of doing business with Germany, but these were shattered by the collapse of the German mark and as a matter of precaution several large consignments intended for Germany have been diverted to Rotterdam.
As a measure of retaliation for South Africa's restrictions on the import of wheat and boots, Australia is applying an anti-dumping act to South African maize thus closing another promising channel for export.

Area of British Columbia.
British Columbia has an area of 355,855 square miles which is only about seven thousand square miles less than the area of all Egypt, with the frontier districts and the Libyan and Arabian deserts. Without the latter desert areas, Egypt has an area of only 28,181 square miles which is only 1,753 square miles greater than the area of Nova Scotia.

An ocean liner Jones as much as \$5,000 in thefts of silver and linen by souvenir hunters.

A Simple Tipping Gear

New Solution Has Been Patented By British Firm

The number of devices invented for raising the body of a wagon so that its contents may be tipped out on to a dump in legion. Most of the forms adopted are slow in action if they are simple, and if the action is rapid the mechanism is very heavy and complicated, especially where side tipping as well as rear tipping is required. Some interest therefore will be taken in a new solution patented by a British firm. It consists simply of an ordinary jack fixed on the chassis immediately beneath the centre of the body, and operating in a half-and-socket joint which enables it to tilt in any direction as the jack is raised or lowered. The body rests on hinges which can be adjusted for side tipping—either side—or for rear tipping. When the wagon has to be tipped, all that is necessary is to arrange the hinges in a suitable way and operate the jack by means of the engine on the car. The jack in rising pushes the body over towards the side where the hinges remain fixed. The operation is quite rapid; and in the event of any breakdown of the power the mechanism can be operated by hand. The only additional weight which this invention involves is the weight of the jack and the gears fixing it to the chassis.

Old Song Was Soldier's Favorite

Man Played "Home, Sweet Home" for Dead Son

A touching story of his experiences conducting parties of visitors to graves on the Western Front was told by the Rev. A. H. Lloyd, naval and military secretary to the Church Army. An elderly man, on reaching his son's grave, produced a mouth organ, and began softly to play, "Home, Sweet Home."
"You see," he said, "my poor lad always liked to hear me play this song when he came home on leave, and I should like to play it to him just once more."

It pays to patronize home industry. Buy from the merchants in your own town.

Alberta Hail Losses

Last Season Largest in History Of Province

The amount of hail during the past summer has proved the largest in the history of Alberta, according to figures now furnished by the hail insurance board of the province. Approximately the damage represents 11 per cent. of the total crop, or almost double what it has been in any year since 1912. The damage since the latter year is as follows: 1912, six per cent.; 1914, four per cent.; 1915, six per cent.; 1916, seven per cent.; 1917, 5.8 per cent.; 1918, 3.8 per cent.; 1920, four per cent.; and 1921, 11 per cent. These years give an average loss of 5.55 per cent.

The Thief Paid

Chickens Cost Man More Than He Bargained For.

An Arkansas City woman made \$55 on the sale of six chickens. A man called at her home selected them and said he would call for them the next day. He called but in the darkness of the night. The next day the woman missed the chickens, but where the coop had been she found a pocket-book containing \$55. In it was the name and address of the man who had originally selected the chickens on the pretence that he wished to buy them.—Wichita Eagle.

A Dog's Devotion.

The story of how a dog's devotion led to the discovery of the body of a man who was overwhelmed by a fall of debris and killed while digging for surface coal is reported from Staffordshire, England. The dog's whining and scratching at the heap until the man's arms were uncovered resulted in the recovery of the remains. The animal had to be forcibly removed from the scene of the accident.

Jiggs In Real Life.

A New Yorker told the court his wife threw an entire dinner set at him, one piece at a time, but he didn't explain why he walked for the last piece.—Detroit Free Press.

Ireland has 350 co-operative creameries.

Movement Of Topsoil Will Be Greatly Checked By Good Windbreak

Father and Son Are Optimists

Have Staked Mineral Claims Far From A Railroad

Two Canadians, father and son, have set up location claims upon great deposits of iron and coal in the Lake Athabasca district. This deserves place in the records of cheerful optimism. For the region is one that railroads could reach only after conquering hundreds of miles of quaking bogs. Outlet by water is impossible for bulky materials. The working season is only three or four months long. There are several vast reserves of fuel and metal in the world, some of the greatest being in the Antarctic continent, but their exploitation must follow the exhaustion of supplies in climate-less rigorous. This will not come in the generation of the elder Canadian, or of that of his son, or of his son's son.—Toronto Blade.

Both Working for Humanity.

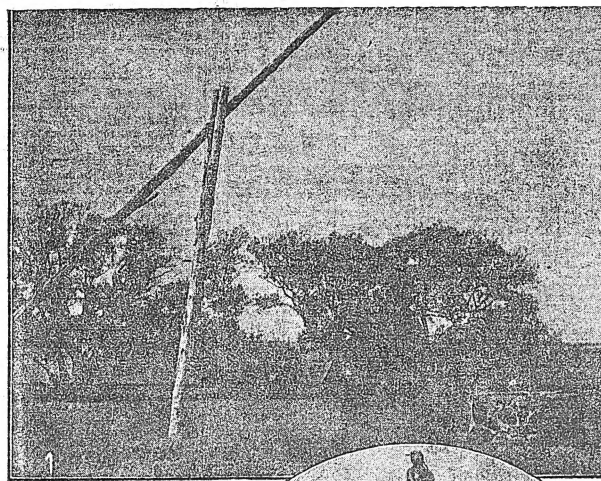

The story is told of a doctor in England at the time of the great railroad strike who, when called upon to attend the child of one of the striking engineers, declined to do, saying he was himself "on a strike." The engineer protested that such a thing was impossible. The doctor's work was for "humanity." "No more than is yours," was the reply. Of course, the doctor went. But he had first taught his lesson.—From the New York Times.

Cattle to China.

Sixty head of dairy cattle, principally from the Fraser River valley herds, comprising selections of Holsteins and Ayrshires, have been sent to China on the order of the Hong Kong Dairy and Storage Company, who are the chief purchasers.

When a woman tried to capture a wealthy husband she evidently believes that his means will justify her ends.

MAKING HISTORY AT GRAND PRÉ

(1) Evangeline well and the willows, Grand Pré, N. S.
(2) Around the statue of Evangeline at Grand Pré.

At Grand Pré, Nova Scotia, the other day, three hundred members of the Acadian National Congress assembled, and kneeling reverently at the statue of Evangeline, the heroine of Longfellow's immortal poem, accepted on behalf of the Acadian race a gift of two acres of the Evangeline Memorial Park from the Dominion Atlantic Railway.

There are in all about fourteen acres in Evangeline Park, and the two acres were presented to the Acadian race on the condition that they would build a church there.

George E. Graham, general manager of the Dominion Atlantic Railway, expressed his pleasure at welcoming the delegates. With regard to the proposed church, the D. A. R. would still further beautify the grounds and would give it perfect setting. The company would open the old post road that had been closed for fifty or sixty years. He asked them to cast their minds forward the next five years when this chapel would be erected, a beautiful sanctuary in the midst of a beautiful country.

Mr. P. J. Venot, minister of highways for New Brunswick, subscribed \$100 for the erection of the new church, and George E. Graham \$100, and the Rev. Father Cormier addressed the people, saying that the church would be erected on the site

of the old church of St. Charles. It would be a facsimile of the church of their ancestors.

Hon. D. V. Landry, Moncton, president of the Acadian Congress, formally took possession of the plot and returned thanks to the Dominion Atlantic Railway for the gift.

Men and women knelt reverently on the ground, the tears streaming down their faces, murmuring blessings on the day that had restored to them the land of their ancestors. They plucked flowers and leaves and dipped their fingers into the water, all of which

were more sacred in their eyes than words could tell.

The pilgrimage to Grand Pré took upon itself all the characteristics of a pilgrimage to Holy Land. In the past, said Mr. Landry, the Acadians had been reproached as an inferior people. That reproach was now eliminated. The ambition of the Acadians now was to unite in work that would make not only for the returning of progress but for the advancement of all Canada. These sentiments were the sentiments of the whole race.

Breaking the mechanical force of the wind benefits the farmer most directly by protecting his grain crops. The value of the windbreak in giving this protection is, of course, difficult to measure in dollars and cents, but where winds are at all frequent such protection alone may be equal to the rental of the ground occupied by the trees. In one case in Southern Minnesota a windbreak, 80 rods long and about 25 feet high along the side of a cornfield, afforded complete protection for a strip about 10 rods wide during a wind blowing at 20 miles an hour. On the unprotected part of the field the wind blew down half the corn and bent the remainder halfway, the damage beginning at the edge of the 10-rod strip and increasing until it was greatest in that part of the field farthest from the windbreak. The corn was in the milk stage at the time of the high wind and did not produce more than a third of a crop on the damaged area. On the protected portion the total saving was 250 bushels, or the full crop of 6 acres, whereas the windbreak occupied only 2 acres.

Movement of the topsoil also may be checked and dust storms prevented by breaking the force of the wind. For this reason windbreaks are of immense benefit in sandy regions or regions where the soil is very fine.

Added to the crop and soil protection there is the personal comfort to be derived from protection from wind about the farm and home and along public roads. Furthermore, a protected home is heated in winter more readily, and hence more cheaply, than one exposed to the wind.

Astor Estate to Sell Office.

What is probably the most nicely appointed house in London, England, is shortly coming into the market, and it will be interesting to see who has the pluck—and the cash to buy it. It is the Astor estate office, the building with the weathercock representing a ship in full sail, which stands in the embankment gardens by the steps leading into Essex Street. It is a palace of rare marbles, rich mahogany and priceless panelings, and it cost about two and a half million dollars.

Record Run For Sawmill.

The Carlisle Pennell Lumber Company has its headquarters at Oakeside, Wash. Recently they made a record run in which more than 300,000 board-feet of lumber was cut on a straight-cut saw in one eight-hour day. In these mills there are 220 electric motors with a capacity of 3,200 horse-power.

Brazil exports to Cuba a dried and salted beef known as xarque.

Oh, Money! Money!

— BY —
ELEANOR H. PORTER

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

(Continued)

"But, really, Mr. Smith, I don't know what I am going to do—with Mellicent," she sighed.

"Do with her?"

"Yes. She's as wild as a hawk and as—well, as a humming-bird, since this money came. She's so crazy with joy and excited."

"What if she is?" challenged Mr. Smith, looking suddenly very busy himself. "Youth is the time for joy and laughter; and I'm sure I'm glad she is taking a little pleasure in life."

"Mrs. Blaisdell frowned again. "But, Mr. Smith, you know as well as I do that life isn't all pink dresses and sugar-plums. It is a serious business, and I have tried to bring her up to understand it. I have taught her to be thrifty and economical, and to realize the value of a dollar. But now—she doesn't see a dollar but what she wants to spend it. What can I do?"

"You aren't sorry—the money came," Mr. Smith was saying her with a quizzical smile.

"Oh, no, indeed," Mrs. Blaisdell's answer was promptly emphatic. "And I hope I shall be found worthy of the gift, and able to handle it wisely."

"Er—ah—you mean?" Mr. Smith was looking slightly taken aback.

"I mean that I regard wealth as one of the greatest of trusts, to be wisely administered," Mr. Smith, she smiled a bit importantly.

"Oh?" suggested the man.

"That is why it distresses me to see my daughter so carried away with the mere idea of spending. I thought I'd taught her differently," sighed the woman.

"Perhaps you taught her—too well. But I wouldn't worry," smiled Mr. Smith, as he turned away.

Deliberately then Mr. Smith went in search of Mellicent. He found her in the music-room, which had been cleared for dancing. She was surrounded by four young men. One held her fan, one carried her white scarf on his arm, a third was handing her a glass of water. The fourth was apparently writing his name on her dance card.

The one with the card Mr. Smith recognized as Carl Pennock. The one writing on the dance programme he knew was young Herbert Gaylord. Mr. Smith did not approach at once. Leaning against a window-casing near by, he watched the kaleidoscope of faces hovering a not too conspicuous attention upon the group about Miss Mellicent.

Mellicent was the picture of radiant loveliness. The rose in her cheeks matched the rose of her gown, and her eyes sparkled with happiness. So far as Mr. Smith could see, she dispensed her favors with rare impartiality; though, he came toward them finally, he realized at once that there was a merry wrangle of some sort afoot. He had not quite reached them when, to his surprise, Mellicent turned to him in very evident relief.

"There, Mr. Smith," she cried joyfully. "I'm going to sit it out with him. I shan't dance with either of you."

"Oh, Miss Blaisdell!" protested

Do Your Ears Buzz? Have You Headaches?

When your ears ring, your head aches, and you seem slightly dizzy or hearing, beware of Catarrh. Mr. J. A. Hammill, writing from Greenmount, N. Y., was similarly troubled. He writes: "No one could have worse Catarrh than I had for years. It caused partial deafness, bad taste, and my stomach, made me sick all over. 'Catarrh' cleared my nostrils, stopped the cough and gave me a clear feeling in my breathing organs. I am now absolutely well thanks to Catarrh. Nothing so certain as a Catarrh Inhaler to strengthen a weak throat, to rid you of bronchitis, to drive out Catarrh, coughs and colds. Sold everywhere, 25c, 50c and one dollar for complete two months treatment. Dealers, The Catarrh Co., Montreal."

young Gaylord and Carl Pennock abjectly.

But Mellicent shook her head.

"No. If you will write your names down for the same dance, it is nothing more than you ought to expect."

"But divide it, then. Please divide it," they begged. "We'll be satisfied."

"I shan't be!" Mellicent shook her head again merrily.

"I shan't be satisfied with anything—but to sit it out with Mr. Smith. Thank you, Mr. Smith," she bowed, as she took her promptly offered arm.

And Mr. Smith bowed away followed by the despondent groans of the two disappointed youths and the taunting glances of their companions.

"There! Oh, I'm so glad you came," sighed Mellicent. "You didn't mind?"

"Oh, yes. I'm in the seventh heaven!" gaweyed Mr. Smith with exaggerated gallantry. "And it looked like a success."

Mellicent laughed. Her color deepened.

"Those boys—they're so silly!" she pouted.

"Wasn't one of them young Pennock?"

"Yes, the tall, dark one."

"He's come back, I see."

"She flashed an understanding look into his eyes."

"Wasn't he?"

"Oh, yes, he's come back. I wonder if he thinks I don't know—why?"

"Oh, Mr. Smith, I'm smiling quizzically."

She shrugged her shoulders with a demure drooping of her eyes.

"Oh, I let him come back to a certain extent. I shouldn't want him to think I cared or noticed enough to keep him from coming back—none."

"But there's a line beyond which he may not pass, eh?"

"There certainly is—but let's not talk of him. Oh, Mr. Smith, I'm so happy!" she breathed ecstatically.

"I'm very glad."

In a secluded corner they sat down on a gift settee.

"And it's all so wonderful, this—all this! Why, Mr. Smith, I'm so happy I want to cry!"

"And that's so silly—to cry! But I do. So long—all my life—I've had to wait for things. It was always by and by, in the future, that I was going to have—anything that I wanted. I had to wait to have the like this, all at once, everything I want—why, Mr. Smith, it doesn't seem as if it could be true. It just isn't true."

"But it is true, dear child; and I'm so glad—you've got your five-pound box of candy all at once at last. And that's true. I just want your friends to unlimited soda waters."

"Oh, I can! But that isn't all. Listen!" A new eagerness came to her eyes. "I'm going to give mother a present—a frivolous, foolish present, such as I've always wanted to. I'm going to give her a gold breast-pin with an amethyst in it. She's always wanted one. And I'm going to take my own money for it, too—not the new money that father gives me, but some money I've been saving-up for years—dimes and quarters and half-dollars in my baby-bank. Mother always made me save 'most every cent I got, you see. And now I'm going to do it now for this pin. She won't mind if I spend it foolishly now—with all the rest we have. And she'll be so pleased with the pin!"

"And she's always wanted one?"

"Yes, always; but she never thought she could afford it. But now—! I'm going to open the bank tomorrow and count it; and I'm so excited over it that she's laughed shamefully. I don't believe Mr. Fulton himself ever took more joy counting his millions than I shall take in counting those quarters and half-dollars to-morrow."

"I don't believe he ever did." Mr. Smith spoke with confident emphasis, yet in a voice that was not quite steady. "I'm sure he never did."

"What a comfort you are, Mr. Smith!"

"You always understand so! And we miss you terribly—honestly we do—since you went away. But I'm glad Aunt Maggie's got you. Poor Aunt Maggie! That's the only thing that makes me feel bad—about the money. I mean—and that is that she didn't have some, too. But mother's going to give her some. She says so."

But Mellicent did not finish her sentence. A short, sandy-haired youth came up and pointed an accusing finger at her dance card; and Mellicent said yes, the next dance was his. But she smiled brightly at Mr. Smith as she floated away, and Mr. Smith, content, turned and walked into the adjoining room.

He came face to face then with Mrs. Hattie and her daughter. These two ladies, also, were pictures of radiant loveliness, especially Mrs. Hattie, for every beam of light found an answering flash in the shimmering iridescence of their beads and jewels and opulent sequins.

"Well, Mr. Smith, what do you think of my party?" As she asked the question Mrs. Hattie tapped his shoulder with her fan.

"I think a great deal—'and of your party," smiled the man.

"He turned to Miss Bessie.

"Oh, it'll do—for Filtleton." Miss Bessie smiled mischievously into her mother's eyes, shrugged her shoulders, and passed on into the music-room.

"As if it wasn't quite the finest thing Filtleton ever had—except the Gaylord parties, of course," bridled Mrs. Hattie, turning to Mr. Smith.

"That's just daughter's way of teasing me—and, of course, now she is where she sees the real thing in entertaining—she goes home with those rich girls in her school, you know. But this is a nice party, isn't it, Mr. Smith?"

"It certainly is."

"Daughter says we should have wine; that everybody who is anybody has wine now—champagne, and cigarettes for the ladies. Think of it—in Filtleton! Still, I've heard the Gaylords do. I've never been there yet, though, of course, we shall be invited now. I'm crazy to see the inside of their house; but I don't believe it's much handsomer than this. Do you? But there! You don't know, of course. You've never been there, any more than I have, and you're a man of simple tastes. Judge, Mr. Smith."

She smiled graciously. "Benny says that Aunt Maggie's got the nicest house he's ever seen. I don't know, but I'm sure, so you see, I have grounds for my opinion."

Mr. Smith laughed.

"Well, I'm not sure I ever said just that to Benny, but I'll not dispute it. Miss Maggie's house is indeed wonderfully delightful—to live in."

"I've no doubt of it," conceded Mrs. Hattie complacently. "Poor Maggie! Some of us did counting to make the most of everything she had. But she's never been ambitious for really nice things. I imagine Aunt Maggie always seems contented enough with her shabby chairs and carpets. While I—"

"She paused, looked about her, then drew a blissful sigh. "Oh, Mr. Smith, you don't know you can't know what it is to me to just look about me—this house, these things, these beautiful things!"

"Then you're very happy, Mrs. Blaisdell?"

"Oh, yes. Why, Mr. Smith, there isn't a piece of furniture in this room that didn't cost more than the last one—I know, because I've been there. And my curtains are nicer, too, and my pictures, they're so much brighter—some of her oil paintings are terribly dull-looking. And my Bessie—did you notice her dress to-day? You didn't, of course. And if you had, you wouldn't have realized how expensive it was. What do you know about the new women's dresses?" she laughed archly. "But I don't mind telling you. It was one hundred and fifty dollars, a hundred and fifty dollars, and it came from New York. I don't believe that white muslin thing of Gussie's—'Pen-neck' cost fifty! You know Gussie."

"I've seen her."

"Yes, of course you have—with Fred. He used to go with her a lot. He goes with Pearl Gaylord more now. There, you can see this minute, dancing together—the one in the blue dress. Pretty, too, isn't she? Her father's worth a million, I suppose. I wonder how 'tall' feel for worth—a million." She spoke musingly, her eyes following the low cut blue dress. "But, then, maybe I shall have some time from Cousin Stanley, I mean," she explained smilingly, in answer to the question she thought she saw behind Mr. Smith's smoked glasses. "Oh, of course there's nothing sure about it. But he gave us some, and if he's dead, he's dead, and other letters'll be opened in two years; and I don't see why he wouldn't give us the rest, as long as he's shown he remembered he'd got 'em. Do you?"

"Well—yes—as to that—" Mr. Smith hesitated. He had grown strangely red.

"Well, there aren't any other relations so near, anyway, so I can't help thinking about it, and wondering," she interposed. "And it would be millions, not just one million. He's worth ten or twenty, they say. But, then, we shall know in time."

"Oh, yes, you'll know—in time," agreed Mr. Smith with a smile, turning away as another guest came up to his hostess.

Mr. Smith's smile had been rather forced, and his face was still somewhat red as he picked his way through the crowded rooms to the place where he could see Frank Blaisdell standing alone, surveying the scene, his hands in his pockets.

"Well, Mr. Smith, this is some show, ain't it?" greeted the grocer, as Mr. Smith approached.

"It certainly is."

Urges Germany Not to Join League

Should Wait For U.S. and Russia Says Dr. Simon

Germany would make a "grave mistake" if it should enter the League of Nations while the United States and Russia stand outside that organization, declared Dr. Walter Simon, former minister of foreign affairs, in an interview with the Gröbenkirchen Gazette. He added he expected the United States would help Germany, but declared he did not know the form this assistance would take. He suggested the possibility, however, of a man in the United States might see Germany as a middleman in an effort to obtain Russian trade.

DODD'S KIDNEY PILLS

BRIGHT'S DISORDER OF THE KIDNEYS

4087 THE PR

How Many Women

with sensitive skins, but what dread another Canadian winter? Yet chapped hands, chilblains, cold-sores and frost-bites are readily overcome by Zam-Buk. This famous balm keeps the skin smooth, healthy and flexible under most trying conditions. Zam-Buk's pure herbal essences are so highly refined that the pores and tissues absorb them readily. They take out smarting pain and irritation instantly, heal roughness and sores, and prevent eczema and blood-poisoning.

Miss B. Stroppe, of East Hansford, N.S., writes:—"My hands bleb and became so painfully chapped that I dare not put them in water. Zam-Buk caused smarting pain and sores to quickly disappear and I continued to use it until my hands were thoroughly healed."

Miss A. Lepard, of Beaverdale, Ont., writes:—"Where other remedies all failed, Zam-Buk soon rid me of chilblains. It speedily ended the itching irritation, drew out the inflammation and healed perfectly." Also splendid in eczema, ulcers, abscesses, piles, poisoned wounds, cuts, burns and scalds. 50c, all dealers.

Egg Yield Greater In Warm Climate

Experiments Prove Belief of Poultryman to be Correct.

It is an old belief among poultrymen that the climate of a country has an appreciable influence on egg production. Most of the world's records for egg production have been made in warm temperate climates, such as prevail in the Southern Atlantic States or in the Western Pacific States. We would expect greater production under the same conditions in Ontario than in the prairie provinces and greater production in British Columbia than in either of the foregoing. Prof. M. C. Hermer, of the Manitoba Agricultural College, contends that a hen laying 150 eggs on the prairies would likely lay close to 200 in the east or south. To find out whether his contents were right or wrong, he shipped, in August, 1919, 25 White Leghorns, 25 Buff Orpingtons, 25 heavy laying strains to the poultry department of the North Carolina Agricultural College. A pen of the same age, breeding and weight was retained at the Manitoba institution, and both pens were fed exactly alike.

The difference in favor of North Carolina was 328 eggs, or an average of 253 eggs a hen more than in Manitoba. The result verifies old contentions as to the importance of climate in its relations to egg yields but this should not discourage the poultry keeper in any climate, as hens well attended to are always profitable.

Hate Off to Wives.

Charles M. Schwab said at a dinner in his native Loretto:

"All men owe their success in great part to their wives. The more successful a man is, the reader is he to acknowledge this truth."

"Two brothers, a shabby and a spruce one, sat on an ocean pier."

"Why the dickens," said the shabby brother, "do you let your wife tell people that she made a man of you?"

"You never heard my wife say such a thing as that."

"No," answered the spruce brother, "but I've heard her say she tried her hardest."

Counting a Billion

Would Take a Person Over Nineteen Thousand Years

What is a billion? The reply is very simple—six million times a million. This is quickly written and quicker still pronounced. But no man is able to count it. You count 100 to 170 a minute; but let us suppose you go as far as 200, then an hour you produce 12,000, a day 288,000 and a year 365 days (for every four years you may rest from counting during leap year) 105,120,000. Let us suppose, now, that Adam, at the beginning of his existence, had begun to count, had continued to do so, and was counting still, he would not even now, according to the usually supposed age of our globe, have counted near enough. To count a billion he would require 9,512 years 34 days 6 hours and 20 minutes, according to the above rule. Now, supposing we were to allow the poor counter 12 hours daily for rest, eating and sleeping, he would need 19,024 years 69 days 10 hours and 40 minutes. In Canada, however, a thousand millions is usually called a billion.

Fulness After Eating

If you have fulness after meals, a bad taste to your mouth in the morning, fat on the tongue, flatulence after meals and no appetite, take **Mellin's Food**. It will clean your tongue, renew your appetite, give you relief for food and the power to digest it thoroughly and easily. Sold in 50c. and \$1.00 bottles at drug stores.

Indoor Life

Spending more time indoors makes women far more subject to constipation than men.

The liver becomes sluggish and torpid, the bowels constipated and the system poisoned by impurities.

If you would get away from the myriads of ills which result from constipation, it is only necessary to use Dr. Chase's Kidney-Liver Pills.

The benefits from their use are as lasting as their effects are prompt and certain.

Mrs. John Barry, 18 St. Amable Street, Quebec, Que., writes:

"This is to certify that I was troubled for years with constipation and tried all kinds of medicines without relief. At last my husband suggested that I try Dr. Chase's Kidney-Liver Pills. I did so, and must say that they have given me more relief than all the medicine I have taken during the last fifteen years. I may also add that I have used Dr. Chase's Ointment for piles with excellent results."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers or Edmonson, Bates & Co., Ltd., Toronto.

The Tobacco with a heart

Weekly Publishers
Convene in Edmonton

The last of a series of five conferences held in the West by the Weekly Newspaper Association was held at the McDonald hotel, Edmonton last Friday. General business conditions were discussed, including the standardization of advertising and subscription rates of Canadian Weeklies. During the session addresses were also given by the president, W. C. French, and E. Roy Sayles, general manager of the Canadian Weekly Newspaper Association.

After the session the newspaper men together with representatives of the local papers were the guests to a dinner at the McDonald hotel given by W. C. Riddell, advertising agent of the Canadian National Railway.

Catholic Ladies Auxiliary

The C.L.A. will meet at the home of Mrs. Forest on Friday of this week, Nov. 11.

All members are requested to attend as plans are to be discussed in regard to the sale to take place on Nov. 26. Also members are to bring in their monthly donations to the Auxiliary that are to be sold at the sale.

Village Council

The regular meeting of the Village Council was held last week. The minutes of the last regular meeting, and of the special meeting of the 20th were read and adopted.

The following accounts were passed:

| | |
|------------------|--------|
| Service Garage | 28.25 |
| Banner Hardware | 11.00 |
| G. Cruickshank | 28.00 |
| Star Livery | 6.00 |
| Imperial Lbr Co. | 124.80 |
| Chinook Advance | 13.50 |
| C. E. Barry | 2.50 |
| M. E. Bird | 45.64 |
| S. H. Smith | 3.00 |

The Secretary was instructed to write the C.N.R. Roadmaster, to build ainder walk from the station to the cement crossing on railway avenue.

That a notice be inserted in the local paper that, in accordance with the Fire Prevention Act, no buildings are to be banked with manure for winter.

Mrs. M. E. Clark, who has been visiting in Vancouver for the past four months, returned Wednesday.

Miss S. Lund, who was called home on account of the serious illness of her mother, left Friday for Lambra near Red Deer.

Mrs. S. B. Featherstone left on Wednesday for Calgary where she will spend the winter.

Personalities

Miss Blanche C. Deman, who recently underwent an operation in Calgary for appendicitis, returned home last Friday. She was accompanied by her sister, Miss Alice Deman.

Mr. Jas. McDonald, of the Union Bank here, spent the weekend in Calgary.

Mr. and Mrs. R. S. Woodruff were visitors in Edmonton last week.

Mr. Robert Smith attended the Weekly Publishers' Convention held in Edmonton last Friday.

Mr. and Mrs. C. Pollock, Miss Davis, Supt. of the Chautauqua, and Mr. Hyde were the guests at the Hind's home for dinner on Thanksgiving Day.

Mr. and Mrs. L. Robinson and son motored to Sijbald for the Thanksgiving holiday.

Mr. Jas. H. Winch and family left last Friday for Ontario where they will spend the winter.

Miss Alice Deman is assisting in the Union Bank here during absence of Miss Lund.

Teachers' Convention

The eighth annual convention of the teachers of the Chinook-Hanna inspectorates which took place in Youngstown last week, was pronounced by all to be a great success. In point of members in attendance and interest shown throughout the sessions, it much exceeded all former meetings. Over one hundred and twenty-five teachers were present.

The sessions were held in the assembly hall of the School of Agriculture, a most ideal place for such a gathering. A pleasing feature was the large number of citizen visitors, particularly at the night session, when Dr. Coffin, principal of Calgary Normal School, addressed the convention. He said in part: "We are doing much to educate our children to take an intelligent part in the business affairs of every day life, so that they can earn a good living for themselves. This is all very well. But what are we doing to teach them so that they can make an intelligent use of their leisure time? This also is important. If we are to judge from what young people usually do to day for recreation, very few know how to employ their leisure moments. And herein lies a grave danger to the State."

NOTICE

The Chinook Village Council hereby give notice that in accordance with the Fire Prevention Act, no buildings are to be banked with manure for the coming winter.

For the benefit of those in need the Chinook Women's Institute have undertaken to gather as much clothing as can be procured. Please bring all you can and leave it Mrs. R. Vanhook's where the distributing committee will take charge of same.

Canadian Rockies Abound In Legendary Lore

The countless peaks that cover vast stretches of western Canada are wrapped in Indian legends as well as clouds of snow. Many of these are locally familiar, some are widely known, but a rich field awaits the delver into the Indian lore concerning this region. Perhaps another Canadian woman with a strain of Indian blood in her veins will do for the Canadian Rockies what Pauline Johnston did for Vancouver by collecting the Siwash legends. Banff and its environs are particularly rich in legendary atmosphere. It is safe to say that ninety per cent of the thousands who stop at Banff annually enjoy a boat ride across Lake Minnewanka, a beautiful sheet of water rimmed in by forbidding mountains. The Indians had many legends concerning this lake, the most popular hinging on its name, which means Spirit Waters. The legend runs that an Indian chief was crossing the lake in a canoe when an evil spirit arose from the waters, wrecked the frail craft and carried the chief down into the depths of the lake, from which the body never rose again. Indians to shun the lake, but white men laugh at the tale and find these waters attractive for boating, fishing and camping. Lake Minnewanka is some 15 miles long and between two and three miles wide. A comfortable launch makes the 22-mile trip regularly. At the southern end a stop is made to allow passengers to inspect the scenic marvels, one of which is a gigantic "Hoodoo," which rises like a monument from the back of a rushing torrent, and bears a balanced rock upon its apex. Nearby is an excellent camping site and another is on the north shore opposite the entrance to Aymer's Canyon, from which it is comparatively easy to reach 10,000 foot Mt. Aymer. Lake trout of great size inhabit Minnewanka and prove a magnet sufficient to counter-balance the fears of any superstitious fishermen, as attested by the numbers who stop at the Chalet beside the lake.
